Radiant Floor Heating

You thoughtfully
chose each color,

each fabric,

every detail,

all to give your
home a feeling
of warmth.

Only to find that
real warmth is
hidden beneath
the floor.

A warm and cozy home begins with radiant floor heating from Uponor.

With Uponor radiant floor heating, every inch of your home feels comfortable. Even bathrooms, entryways and basements are as warm and cozy as the living room — that's because radiant floor heating offers the most even, energy-efficient temperatures throughout the entire home.

The idea is simple...

Because hot air rises to the ceiling, forced-air heating systems are significantly inefficient and provide uneven temperatures throughout a home. Uponor radiant floor heating systems circulate warm water through crosslinked polyethylene (PEX) tubing located beneath the floor — keeping the heat at your feet.

Radiant floor heating systems work with all types of flooring surfaces, including carpet, wood, tile, stone, laminate and concrete. In fact, radiant systems can even be used to melt snow and ice from driveways and walkways, eliminating the need to salt or shovel.

And because radiant systems work in “zones”, you can adjust temperatures in different areas of the home at the same time. So unoccupied rooms have a different temperature than occupied rooms — making the system even more energy-efficient.

Thinking Beyond the Floor

Radiant isn't only for the floor. Use radiant heat to warm the surfaces in a tub surround or shower — even create fogless mirrors. And for the ultimate comfort, you can add radiant to your towel bars! Just think about the inviting warmth of a cozy towel straight out of the dryer. That's the same feeling you will get with a heated towel bar.

Feel Confident with Uponor

Uponor (formerly Wirsbo) was the first company to bring radiant floor heating to North America more than 40 years ago. With more than 15 billion feet of our tubing installed in structures around the globe, you can feel confident that our system will provide your home with the comfort, efficiency and reliability you deserve.

And the radiant tubing in the Uponor radiant floor heating system is backed by a 30-year limited warranty* so you know the system installed in your home is designed to last.

*Visit www.uponor-usa.com/warranties for complete details.

Radiant for Remodels

When it comes to remodeling your basement, you want the most comfortable, inviting atmosphere possible. By adding Uponor radiant floor heating, you can have all the comfort along with the energy efficiency and indoor air quality radiant provides.

In fact, with Uponor's products designed specifically for remodels, you can have a complete radiant floor heating system installed in as little as two days!

Uponor's Radiant Ready 30E™ complete radiant mechanical room package coupled with Fast Trak™ or Quik Trak® floor panels make the installation seamless.

Keep the Heat at Your Feet

Forced Air

Forced-air systems circulate uneven temperatures — in addition to dust, allergens and other pollutants — throughout the home.

Radiant Heat

Uponor radiant floor heating concentrates heat near the floor where people are located.

Feature	Forced Air	Radiant Heat
Warm, cozy floors	No	Yes
Concentrates heat near the floor, furniture and family	No	Yes
Provides comfortable, even heat throughout the house	No	Yes
Eliminates cold, drafty rooms	No	Yes
Can dramatically reduce heating bills	No	Yes
Helps keep household air free of allergens and pollutants	No	Yes
Quiet, no noisy motors, blowers or fans	No	Yes
Maintenance-free	No	Yes
30-year warranty*	No	Yes

*Uponor PEX tubing used in heating systems is backed by a 30-year warranty when installed by an Uponor-trained professional contractor. To learn more, visit www.uponor-usa.com/warranties.

Comfortable

Radiant floor heating circulates warm water beneath the floor for even warmth throughout the entire area of a home.

Energy Efficient

In addition to the incredible comfort it provides, radiant floor heating is hands down the most efficient and economical way to heat a home.

Versatile

Radiant floor heating systems work with all types of flooring surfaces, including carpet, wood, tile, stone, laminate and concrete.

Guaranteed

The PEX tubing in Uponor radiant floor heating systems is backed by a 25-year limited warranty* when installed by an Uponor-trained professional.
